Membrana Weekly News

Updates in Beta 1.0:

We have reworked leaderboard of the competition.

Add custom modals to whole project (replace all alerts).

Rewrite REST service to TypeScript.

Completed second step out of three for contract stop-loss implementation.

We have finished 6th round of competition. All the results as usual can be found in leaderboard. Also, now you can see reward transactions for participants by clicking to attached etherscan link.

We have a large interview with most successful traders of our platform and get some insight and their opinion on our platform and crypto in general. Don't miss it, it is available on our official Medium.
